DETAILED ACTION

Reissue Applications

1. The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Allowable Subject Matter

- 2. Claims 1-44 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to suggest a chassis frame and module combination comprising:

- 1) an amplifier module having:
- a housing of electrically conductive material defining an enclosed interior; said housing having a front face and an opposite rear face separated by opposite side walls and opposite end walls, with each of said faces and sidewalls being of predetermined dimension and with said sidewalls being parallel to one another; each of said end walls

having a projecting flange extending in a common plane generally parallel to said sidewalls

and with said common plane offset from a central longitudinal axis of said housing; said

front face including end portions exceeding beyond each of said end walls;

- two coax connectors secured to said rear face with an outer shield of said coax connectors electrically coupled to said housing;

و ۸

Serial Number: 09/977,626

Art Unit: 2684

Page 3

- a circuit board contained within said interior and positioned generally parallel to and spaced between said sidewalls; said circuit board having a component side opposing a first of said sidewalls and a ground side opposing a second of said sidewalls, said ground side including a layer of electrically conductive material electrically connected to said housing; a plurality of connection locations on said circuit board, each of said connection locations including a ground connections for connecting ground shields of coax cables to said layer of electrically conductive material; said component side of said circuit board including a circuit component interconnected with said connection locations through a circuit path; said circuit component including an amplifier circuit selected to amplify a RF signal supplied to one of said coax connectors and to provide an amplified RF signal to the other of said coax connectors; said coax connectors connected to said connection locations, each of said outer shields of said coax connectors connected to said ground connections of said connection locations;

a power supply port located on said rear face; said power supply port interconnected tosaid amplifier circuit through a circuit path of said circuit board;

- 2) a chassis frame including a pair of spaced apart walls, said wall spaced apart by a distance substantially equal to a distance between said end walls of said module; each of said walls including a groove, each groove sized to slidably receive one of said projecting flanges;
- 3) a lock member for locking at least one of said end portions to said chassis frame;

Serial Number: 09/977,626 Page 4

Art Unit: 2684

4) a transformer separate from said amplifier module, said transformer mounted to said chassis frame, said transformer electrically coupled to said power supply port of said amplifier module for powering said amplifier circuit as claimed in claim 1 and with same limitations in claims 10 and 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2684

Conclusion

6. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony Thuan Nguyen whose telephone number is (703) 308-5860. The examiner can normally be reached on Monday-Friday from 9:00 AM to 6:00 PM, with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Hunter, can be reached at (703) 308-6732.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Technology Center 2600 Customer Service Office** whose telephone number is **(703) 306-0377**.
